How to unlock the front door

Reached the front door and can't seem to get this thing to budge? Ah, so close yet so far... read on, young grasshopper!

Place the palm of your hand on the number pad

Make sure its your whole palm! This will light up the numbers on the screen.

Secret pin, please!

We are afraid of intruders, as you should be too! The pin to the door will be shared with you in the Slack group you are added to. Save it and don't share it!

Don't forget the '*' key!

After you've pressed the numbers, press the asterisk (*) key and wait for the door to open!

Front-End Schedule

Day 1 - Intro to HTML/CSS

Day 2 - CSS Layout

Day 3 - Responsive Design & Bootstrap

Day 4- Intro to JavaScript
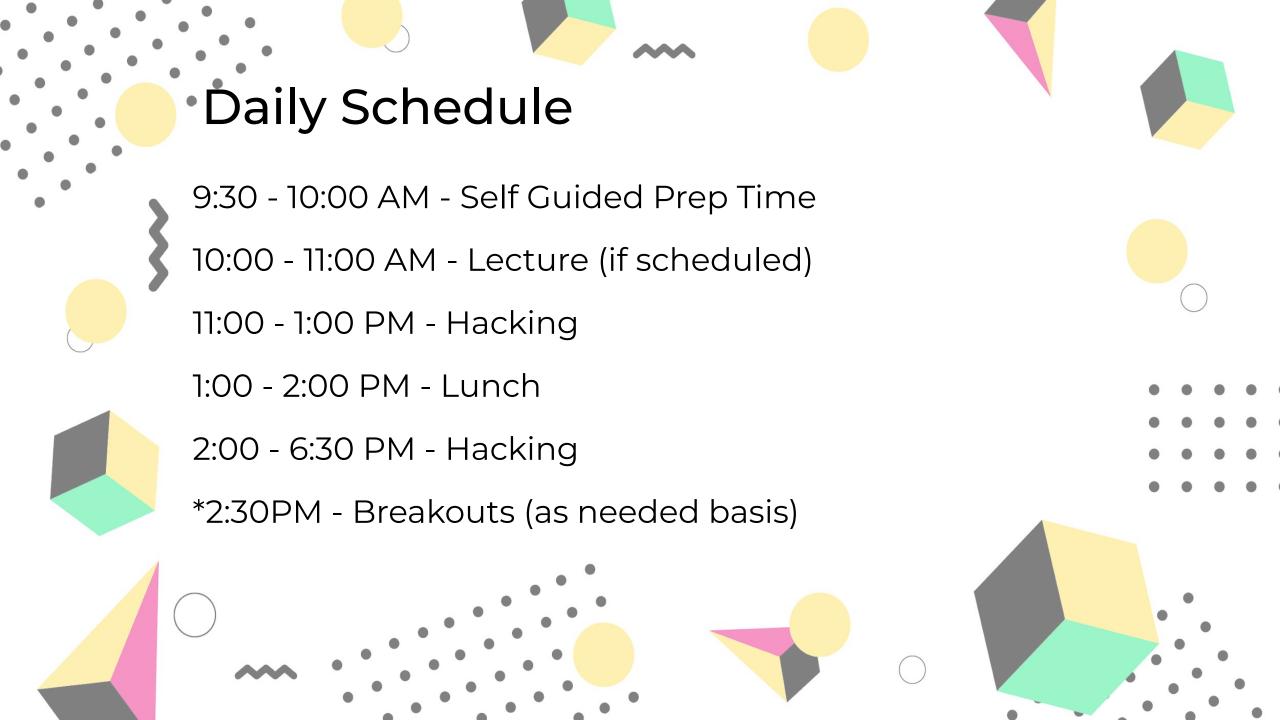

Day 5 - JS - Loops

Day 6 - JS - Interactivity

Day 7 - JS - Games

Day 8 - JS - Tic Tac Toe
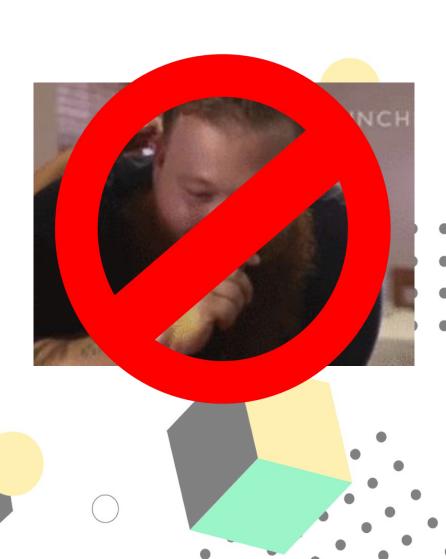

Day 9 - Intro to API

Day 10 - JS - Message Board & jQuery

Daily Schedule

9:30 - 10:00 AM - Self Guided Prep Time

10:00 - 11:00 AM - Lecture (if scheduled)

11:00 - 1:00 PM - Hacking

1:00 - 2:00 PM - Lunch

2:00 - 6:30 PM - Hacking

*2:30PM - Breakouts (as needed basis)

Bootcamp Survival Guide

What to expect from us. We will..

Show you the way and ensure you are moving in the right direction

Point you to **useful resources** that you may use in solving your challenges

Help you develop a **programmer's mindset**

Challenge you to **go the extra mile**

Do not expect to...

Be spoon fed with the solutions by mentors. You must learn to solve your own challenges.

Get all the information you need from the curriculum. Expect to Google a lot!

1. Be Resourceful

Google

stackoverflow

w3schools.com

YouTube
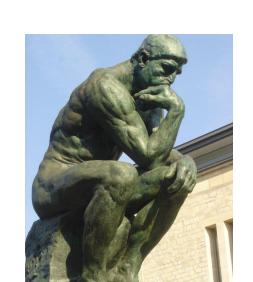

It is CRUCIAL that you **learn how to search for relevant information independently.**

By the time you leave the bootcamp, we want you to be **independent and competent** coders.

You are expected to have searched for a solution before asking the mentors for help.

2. Prioritize Understanding

There is a difference between finding an answer and understanding the answer- your goal is to **understand.**

Do not blindly copy and paste.
**Read the original code and re-type it out yourself**

3. Optimize Your Time & Energy

Programming can be a deep subject and it is easy to get lost in the woods – at times, you may need to skim over the nitty gritty things.
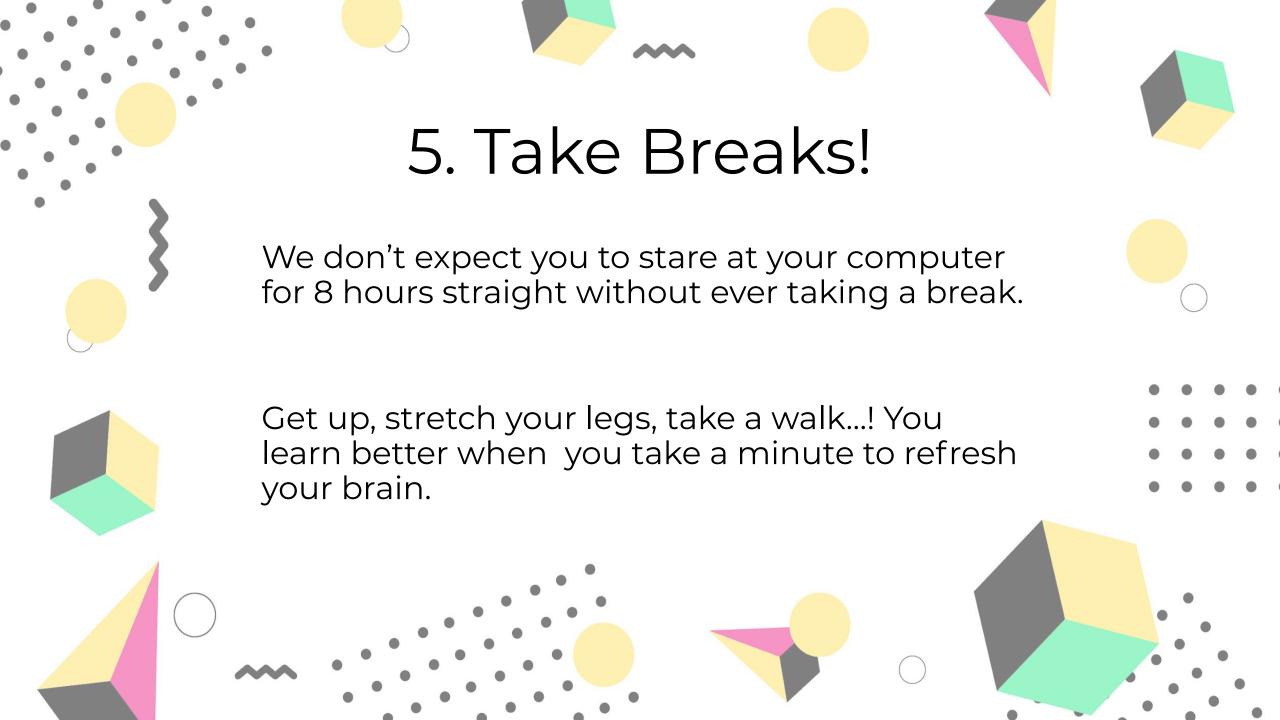

Focus on getting what you need to solve your challenges .

4. Make sure you are well rested

This is an **intensive** course which will stretch the capabilities of your mind. **You MUST get sufficient sleep,** else you risk burning out (7-8 hours of sleep is recommended).

Drink coffee if needed (we love coffee) - but not right before you sleep.

5. Take Breaks!

We don't expect you to stare at your computer for 8 hours straight without ever taking a break.

Get up, stretch your legs, take a walk…! You learn better when you take a minute to refresh your brain.

5. Be on time!

- Let us know in advance if you are going to be late (slack us!)

- Lectures are typically given in the morning and need to start on time

- We may adjust the schedule *if* you let us know in advance that you expect to be late

6. Do not miss any classes!

Missing a single day can be devastating
the course moves FAST.
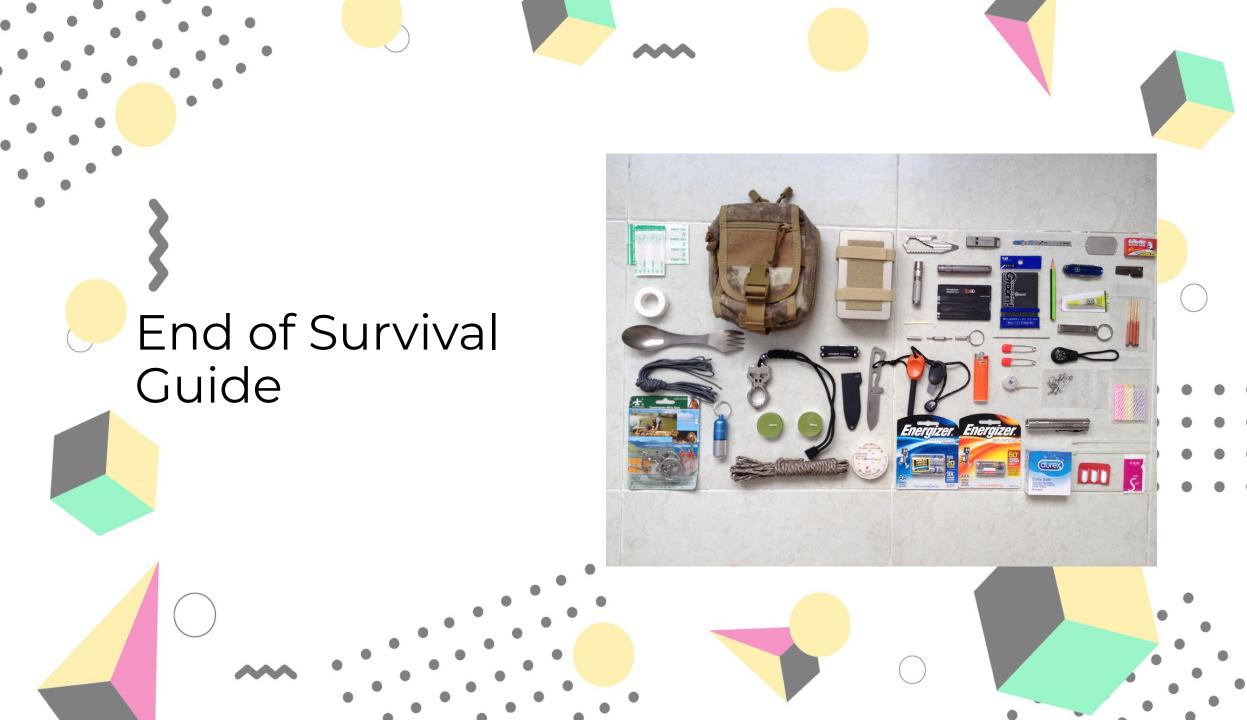

If you have an emergency and have to miss class ...

- Slack a mentor and let them know
- Be sure you catch up with the things you've missed
- Mentors may help bring you up to speed on their own time

7. Don't give up!

The course is designed to push you and challenge you along the way. There might be times when you get frustrated.

Everyone learns at different paces! Don't worry if the person next to you is far ahead. It's not a competition, do things at your own pace, but ultimately **make sure you understand!**

End of Survival Guide

Housekeeping

House Rules

- Be helpful to your peers and mentors
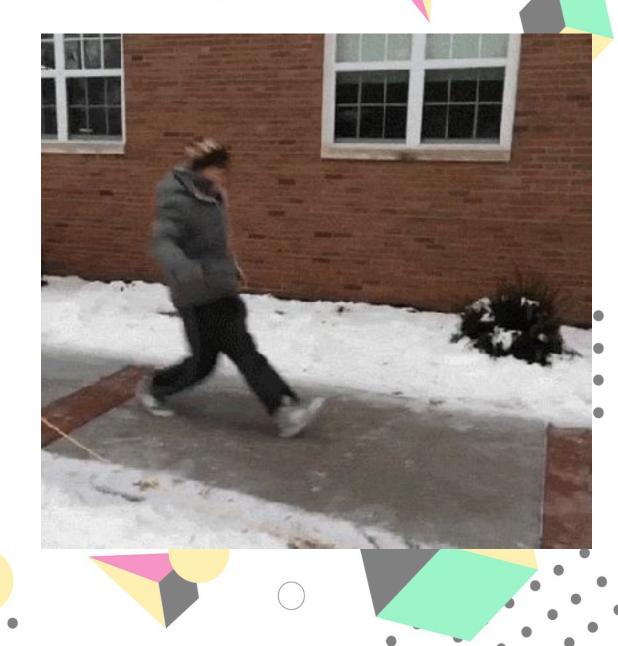

- Respect one another

- Keep the classroom clean

Nearby Amenities

- Convenience Stores
  - 7-Eleven
  - Family Mart - TTDI MRT
